WESTERNEX

CORTEX Bag Scanners

CORTEX Barcode Bag Scanners

Barcode Scanner Kit

The Cortex Scanning companion is a feature-rich and easy to use application for scanning sample Ids. Designed to optimise geological workflows, the unit is configured for logging the following:

- Sample ID
- Time of Capture
- Geolocation
- Project Code
- Hole ID
- Sample From
- Sample To
- Sample Type
- Sample Method
- Parent Sample ID
- Standard ID

SKU
1112-60000

Key Benefits

- Improve accuracy and speed of data collection.
- Reduced data handling allowing data to be integrated directly into the AcQuire System or exported to CSV for import into other third-party systems.
- Optimize business operations by reassigning the task of sample scanning to the drilling service provider. This is possible with the scanning systems ability to retain data allowing it to function as a standalone unit and synchronize data at a later time.
- Feature-rich UI provides details of the current state of the scanning process as well as details of all scanned samples for each hole.
- Validation warnings and alarms further improve accuracy of data by eliminating errors before data is committed.

Included in the Kit

1 x Pistol Grip Reader
1 x Scanner
1 x Waterproof Case
1 x Spare Battery
1 x Screen Protector
1x Scanner Holster
1 x Dual Port Charger
1 x USB C to USB C cable
1 x 1-Slot Charging Cradle

As with all Cortex Companion applications, this unit can be integrated to the wider Cortex ecosystem such as the NURV for real-time data monitoring and cloud-based analysis.

CORTEX Barcode Bag Scanners

RFID Scanner Kit

The Cortex Scanning companion is a feature-rich and easy to use application for scanning sample Ids. Designed to optimise geological workflows, the unit is configured for logging the following:

- Sample ID
- Time of Capture
- Geolocation
- Project Code
- Hole ID
- Sample From
- Sample To
- Sample Type
- Sample Method
- Parent Sample ID
- Standard ID

SKU
1112-60001

Key Benefits

- RFID based scanner scanning illegible barcodes when working with wet samples.
- Improve accuracy and speed of data collection.
- Reduced data handling allowing data to be integrated directly into the AcQuire System or exported to csv for import into other third-party systems.
- Optimize business operations by reassigning the task of sample scanning to the drilling service provider. This is possible with the scanning systems ability to retain data allowing it to function as a standalone unit and synchronize data at a later time.
- Feature-rich UI provides details of the current state of the scanning process as well as details of all scanned samples for each hole.
- Validation warnings and alarms further improve accuracy of data by eliminating errors before data is committed.

Included in the Kit

- 1 x Pistol Grip Reader
- 1 x Scanner
- 1 x Waterproof Case
- 1 x Spare Battery
- 1 x Screen Protector
- 1x Scanner Holster
- 1 x Dual Port Charger
- 1 x USB C to USB C cable
- 1 x 1-Slot Charging Cradle

As with all Cortex Companion applications, this unit can be integrated to the wider Cortex ecosystem such as the NURV for real-time data monitoring and cloud-based analysis.
