PELTOR™ Extreme Performance H10 Series

The H10 Series is a high performance hearing protector and has been developed for use in extremely noisy environments. The protection is based on a technology with a double casing minimising resonance in the casing giving optimum high-frequency attenuation. An acoustic connection between the inner and outer casings provides maximum low-frequency attenuation. The sealing rings are broad and filled with soft plastic foam for the best fit and low contact pressure. Unique double-shell cup design provides high attenuation for eight-hour TWA noise exposures up to 105 dBA

- Represents the ultimate in earmuff technology by combining extreme noise protection with exceptional wearer comfort.
- neckband format.
- Patented liquid & foam filled cushions provide a quality noise seal with low pressure for all day wearer comfort.
- Stainless steel headband wired with four point suspension helps distribute cushion pressure evenly and earcups pivot for consistent fit.

Suggested Applications: General Industry
