1139-00703	7x Triplet
1139-00700	10x Triplet
1139-00701	14x Triplet
1139-00702	20x Triplet

Hand Lenses & Magnifiers

Peak 2001 Pocket Microscope

The outstanding features of this pocket microscope are: very sharp resolving power throughout its field of view, unbelievably bright and light in weight. It is a practical and convenient pocket microscope for the technocrat.

To focus the microscope, hold it so that the notch at the tip of the acrylic cylinder of the microscope faces towards you, place the center of the object lens above the specimen and while tilting the cylinder forward and backward with your eye on the eye-piece lens, fix the cylinder and adjust to the best angle which can give the sharpest image.

SKU	MAGNIFICATION	FIELD OF VIEW
PPM25	25X	3.30mm
PPM50	50X	2.00mm

Caution: Do not look directly at the sun or strong light with this device. There is a possibility that your eyes may be injured. Also be careful not to leave the magnifier where the sun or strong light shine upon. There is a danger of catching fire by the lens brought to focus.

Peak 2036 Pocket Measuring Microscope

Pocket measuring microscope with reticle. New selected the models of 25X and 50X pocket microscope series, with incorporated scales into their lens barrel. The reticle is cross hair with horizontal scale.

To focus the microscope, hold it so that the notch at the tip of the acrylic cylinder of the microscope faces towards you, place the center of the object lens above the specimen and while tilting the cylinder forward and backward with your eye on the eye-piece lens, fix the cylinder and adjust to the best angle which can give the sharpest image.

SKU	MAGNIFICATION	FIELD OF VIEW	MIN.S SCALE DIVISION	RANGE
PPM25SCALE	25X	3.30mm	0.05mm	3.0mm
PPM50SCALE	50X	2.00mm	0.02mm	1.6mm

Close-up of cross-hair on the viewfinder of a 25X unit.
