Zebra Picket Sleeve

The Zebra Picket Sleeves are made from tough, UV treated HDPE material, the caps can be used over and over, they are lightweight, strong and very easy to install. Triangular shape fits over star-pickets. Different colours for different applications. Used in mining to demark heritage & special environments, the versatile design is also ideal for hanging mesh from or attaching signs or reflectors as delineators - or purely as a protection cap.

The common configuration used by mining is a three-section cap (1x top and 2x extensions) at 600mm in total length. The top cap is 300mm long and each added bottom section adds 150mm per unit.

- Versatile, re-usable, tough
- High-Vis Protection
- Use it to hang the Zebra Barrier Roll mesh
- Can support wire/ribbon
- Attach signs, flags, reflectors etc.

Picket sleeve tops and extensions are all purchased individually unless they are a custom order. Custom designs and specifications are available upon the customer's request. Minimum order quantities apply. Star picket is purchased separately.
