Safety Drug & Alcohol

AlcoCheck® FC300e

The accuracy of the AlcoCheck® FC300e breath alcohol test has been established at a blood alcohol concentration of 0.005. The backlit screen changes colour when the alcohol content of the sample exceeds 0.05. Results can be printed via USB cable connection to optional printer.

- 510(k) cleared for OTC
- European fuel cell sensor: 3/4" (19mm)
- Detection range: 0.00 – 0.50%
- Colour change of display if above legal limit
- Available with U.S. and E.U. measurements
- Accuracy: +/- 0.005% at 0.05%
- Memory: 1000 records
- Memory download to PC
- Pro blowing sensor
- Power: 9V battery or DC 12V
- Optional portable printer, cable, and carrying case

AlcoCheck® FC90

The AlcoCheck® FC90 (AT578) handheld fuel cell sensor is certified by the U.S. Department of Transportation (DOT) to conform to the model specification for alcohol screening devices. With accuracy to +/-0.005% at 0.05%BAC, the DOT approved AlcoCheck® FC90 (AT578) meets the standards set by the DOT and National Highway Traffic Safety Administration (NHTSA) for screening devices to measure alcohol in bodily fluids. The FC90 breath alcohol device is also 510(k) cleared for OTC.

- DOT and NHTSA approved
- Electrochemical European fuel cell sensor
- Accuracy: +/-0.005% at 0.05%
- Display range: 0.000-0.200%BAC
- Audible alarm above 0.05%BAC
- Blowing time: 6 seconds
- Testing time: 10 seconds
- Low-battery indicator
- Auto power-off
- Blowing flow detection
- Calibration interval: 12 months
- Power supply: 9V battery
- 1-year warranty
- Memory: 5 records

Alcolizer HH3 Alcohol Tester

Alcolizer HH3 Alcohol Tester (HH3) has been specifically designed for alcohol breath testing in small to medium industrial enterprises. HH3 is the ideal entry-level breathalyser for businesses and industries aiming to maintain a safe workplace for their employees.

Rugged and proven to perform, HH3 conducts Active and Passive testing and enables data download via Alcolizer’s AlcoCONNECT™ Toolbox software.

Alcolizer chooses to exclusively use the highest-grade platinum electrochemical fuel cells for all of our handheld alcohol breath test products, including HH3. Proudly manufactured in Australia to the highest quality standard (ISO:9001) and holding Australian Standard AS 3547 Type 2, HH3 is supported by a 36 month warranty from us – the manufacturer, Alcolizer Technology.

Comes with: AC/DC charger and Vehicle charger, USB data download cable

Alcolizer WM4 Wall Mounted Alcohol Breath Tester with Transit Case

- Self-calibrates every 24 hours
- Instant recovery for zero test
- Unlimited testing
- Ethernet interface
- RS232 serial ports
- Colour LCD display
- LAN connectivity in every mode
- Customisable screen messages
- Strong, durable transit case

SKU
1710-00163

Designed for commercial and heavy use industrial alcohol breath testing. WM4 processes high worker volumes while delivering superior and accurate test results.

WM4 is the only wall mounted alcohol breath tester on the market today with unparalleled connectivity supported “out of the box”. These include an on-board ARM Cortex-A8 CPU and Customer Programmable Colour Screen. WM4 has a range of connectivity options to suit almost every access requirement including; Keypad, Swipe card, WIEGAND, Live Secure Reporting USB and RS232. The WM4 is designed to support your Alcohol and Other Drugs testing programs. Configure WM4 so that you can service simple self-test stations, alcohol test sign-in stations (for visitors and/or contractors) or fully integrated staff management systems. Each new WM4 purchase comes with a strong and robust Transit Case that protects your Alcolizer Wall Mount 4 when transporting or moving it.

Proudly designed and developed in Australia by Alcolizer Technology, WM4 is manufactured in to the highest quality standard (ISO:9001) and holding the Australian Standard AS 3547 Type 3.

Alcolizer Straw Mouthpieces Unwrapped Biodegradable (for WM4)

These new biodegradable straws provide the same experience as plastic straws – that being they have the same fortitude of physical tensile strength, size and durability. Should one of these straws find itself in an open environment, it will after a time become brittle like a leaf and degrade to CO<sup>2</sup> and Biomass. This will not only positively impact landfill capacity but also assist in reducing long-term harmful impacts of plastics on the environment.
